

System Argument Exception - Item Has Already Been Added

Platform

Generic Collect

Summary

Unable launch application because of System.ArgumentException: Item has already been added. Key in dictionary: 'NOT IN FIELD' Key being added: 'NOT IN FIELD'

Description

The following can occur as a result of bad data in the XML file.

Troubleshooting

Contact Alden Support to have them do the following:

1. Alden Support – check the download folder on the server for duplicate records in the XML files.
2. Alden Support – check the live folder using ShowMyPC and remove any duplicate records from the XML files. Can also clear live folder contents instead.

In the above example, there was a duplicate NOT IN FIELD entry in the COHPoleConfigMapIconDef XML file.
